

Design Properties

Clearance Routing Via Biasing Layer Biasing Same net Test Points Layers Grid Fanout Pad Entry Topology

To set the minimum allowable clearance between an object listed in the left column and those in the other spreadsheet columns, enter a number between 0 and 25.4 Millimeters within the cell for each object type. Click a row or column header to set the same value for all objects in that row or column. Click All to set the same value between all design objects listed.

All	Trace	Via	Pad	SMD	Text	Copper	Board	Drill
Trace	0.127	0.127	0.127	0.127	0.127	0.127	0.127	0.127
Via		0.127	0.127	0.127	0.127	0.127	0.127	0.127
Pad			0.127	0.127	0.127	0.127	0.127	0.127
SMD				0.127	0.127	0.127	0.127	0.127
Copper						0.127	0.127	0.127
